Troubleshooting	12

INSTALLATION

- Place the TV in the room where direct light does not strike the screen, the reflection on the picture screen can cause eyestrain. Soft and indirect lighting is recommended for comfortable viewing.
- Allow enough space between the TV and the wall to permit ventilation.
- Avoid excessively warm locations to prevent possible damage to the cabinet or component failure.
- This TV operates on an AC supply provided by the mains voltage of 100-240V.
- Do not install the TV in a location near heat sources such as radiator and direct sunlight.
- Do not cover the ventilation openings.

IMPORTANT SAFETY PRECAUTIONS

Do not block or cover the ventilation openings on the TV. If you have a wall mount, please make sure that it is steady.

Do not remove the back cover.

Unplug the TV before cleaning it. Do not use solvent or liquid to clean the TV. Please clean it with a soft and dry cloth.

In case of troubleshooting, do not use spare parts other than those suggested by the seller.

Unplug the TV during lightening storms or when it is unused for a long time.

Keep away from water and liquids.

INSTALLING THE BATTERIES

If the remote control fails to operate, please replace the batteries and try again.

1. Remove the battery cover by pressing it and sliding it down.
 2. Insert the two 1.5V (AAA size) batteries making sure the polarity (+ or -) of the batteries matches the polarity marks inside the remote.
- Replace the battery cover by sliding it in until you hear a click sound.

Precautions when using batteries

Do not use old and new batteries together.

- Do not use different types of batteries (for example, Manganese and Alkaline batteries) together.
- Note that there are chargeable and non-chargeable batteries.

Do not attempt to charge non-chargeable batteries.

- Remove the batteries from the remote control unit if you do not intend to use the unit for a long time.

Precautions when using the remote control

Avoid physical shocks to the remote control.

Keep the remote control unit dry. Wetting it may cause to malfunction.

ANTENNA CONNECTION

Optimum reception or color requires a good signal and will generally mean that an outdoor antenna must be used.

The exact type and position of the antenna will depend upon your particular area.

NOTE:

It is recommended that the 75-ohm coaxial cable to be used to eliminate interference and noise which may occur due to radio wave conditions.

- The antenna cable should not be bundled with the power cord

POWER CONNECTION

Insert the AC plug into a conveniently located AC outlet.

NOTE:

- This product should be operated only from the type of power source indicated on the marking label.
- Always unplug the AC cord from the power outlet when you do not intend to use for a while.
